All results are confidential and your responsibility to follow up with a physician to discuss any abnormal or critical test results.

Direct Access Testing is defined as a service available for patients to order laboratory testing **without a physician order.**

We recognize the benefits of taking a proactive approach to your health and wellness. That's why we are pleased to offer Direct Access Testing.

Direct Access Testing is performed 7 days a week with no appointment necessary. Please inform the laboratory staff that you are requesting direct access testing, this allows you to choose from a variety of tests and holds **you responsible for your results and getting those to your physician.** You will be asked to complete and sign an order/consent form, and may pay by check/cash/credit prior to labs being performed.

Test results are available to be picked up within the same day or mailed in 3 to 5 business days or you may choose to fax your provider. Test results will not be sent to your employer or insurance company and any **critical results are communicated directly to you, leaving you responsible to follow up with a physician.** If you have questions about your lab results, receive abnormal results or don't feel well, please contact your physician.
